

How Limina Helps Clients

Move Off Spreadsheets & In-House System

Challenges

As your asset management business grows and matures, Excel and in-house systems are no longer adequate

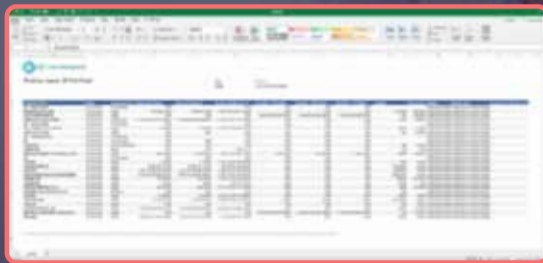

1 Errors and No Audit

90%

- Studies have shown that 90% of spreadsheets contain errors
- Compliance concerns due to lack of audit

2 Not scalable

- Spreadsheets are usually built by one person, creating key person risk
- The spreadsheets often need to be rebuilt as the business evolves

3 Requires Internal Development

In-house systems require costly internal development teams to maintain and adapt, while contributing minimally to performance.

Our Solution

How Limina can help you
Replace In-house Systems and Spreadsheets

Limina IMS

100%

Proven ability to replace up to 100% of in-house code and spreadsheets both in Front Office and Operations

Features That Enable Less Excel and In-House Systems

- 1 Intuitive, easy-to-use solution that Front Office users actually like using
- 2 Built-in data validations, removing the need to perform checks outside the system
- 3 Ability to enrich portfolio views with external data and classifications

Case Studies

 **NLB Skladi**

Wanted to introduce a tool to support future complexity in an environment of high growth domestically and internationally
